BUILDING ON DIFFICULT & SLOPING SITES MADE EASY

2018 Year Review

BUILDING ON DIFFICULT & SLOPING SITES MADE EASY

2018 Building Recap

2018 was an amazing year for the breezewayhouse team as we were able to design and build sixteen spectacular new homes. This has been a rewarding experience for both our team and the home owners. Each new home brings its own set of challenges to overcome whether it's a steep slope, narrow block or flood zone. Overcoming these challenges is exciting as each home has to be individually crafted to suit the personal needs of each client, making sure the natural features the block offers are incorporated into the design to enhance the living environment of each home.

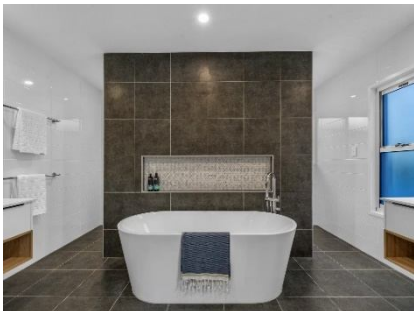

Breezeway House has also acquired a new internationally trained architect in 2018, her vast experience and design knowledge has been incredibly valuable as she develops new dream home designs for clients.

breezewayhouse

Our 2018 Design & Built Home

This home was used as a breezewayhouse display home before being sold in late 2018, setting a new street price record. This home received sensational feedback while it was on the market, there was not only a large interest to buy the home but for it to be built again. This home has been designed to be built on a range of sloping sites, please contact us or view our 'Narrow & Sloping Blocks' page on our website for more information. Home situated in Sherwood, Brisbane.

2019 Ready for Action

breezewayhouse is ready and eager to begin building and designing new homes in 2019. We take pride in producing high quality homes and developing a relationship with our clients that keeps them involved during their build. We continually incorporate processes from client feedback to make sure that building a home with breezewayhouse is as stress-free and a rewarding experience as possible.

We provide exceptional quality homes as we use some of the best trades and suppliers in Queensland to ensure we deliver a product that clients can be proud to call home. We look forward to designing and building new individually designed homes throughout 2019. Please feel free to view our 'Custom Builds' or 'Gallery' pages on our website to get a better idea of our build range and quality.
