

OUR DESIGN PROCESS

How we can design and build an amazing custom home for you

breezewayhouse

BUILDING ON DIFFICULT & SLOPING SITES MADE EASY

breezewayhouse is well experienced in designing unique personalised homes on all different landscapes. Our homes do not only create a wonderful living environment for families but also serve as an excellent investment opportunity.

FIRST CONTACT

To get your ideas onto paper we like to start off with a meeting, so we can best understand what you want your home to look like. In this meeting you can bring in photos of designs you like or a rough sketch for our designers. From your ideas our team is ready to design your dream home.

KNOWING YOUR BUDGET

The best way we can understand the type of home we can design & build for you is to understand your budget. With this we can build a home that best suits you and your lifestyle.

YOUR LOCATION

Unlike most companies breezewayhouse is focused on designing a home that best suits your location. We like to incorporate features of the environment, the slope of your block and the direction your house is facing to come up with the best home for you.

DESIGN READY

From your ideas our design team brings your house to life and you will be able to see the final product through a rendered 3D model. We like to adjust this design with you so you can see the changes on screen and choose what you like best.

Once you are satisfied with the design your home is ready to go from paper to reality.

ENVIRONMENT & VIEWS

breezewayhouse will design your new home to optimise views, privacy, cooling breezes and cross ventilation as well as passive solar orientation. Simply put, we design your home to promote natural heating and cooling. Your home will feel more comfortable to live in, you'll save money on your power bill and you'll reduce your impact on the environment.
